

MEMA District 8 Regional Hazard Mitigation Update

HAZARD RANKING WORKSHEET

For each hazard, please provide a ranking, 0 to 4, based on the criteria listed below. This worksheet will capture **your opinion** of the possible impacts that a mid-ranged event could have on various aspects of each jurisdiction you represent—the area impacted, health and safety consequences, property damage, environmental damage, historical damage, and/or economic disruption. The information will be used to guide the vulnerability discussion for the risk assessment.

Current Methodology

- 0 = No area Impacted
- 1 = Less than 25% impacted
- 2 = Less than 50% impacted but more than 25% impacted
- 3 = Less than 75% impacted but more than 50% impacted
- 4 = More than 75% impacted

Name and Organization _____ The Jurisdiction you Represent _____

Hazard	Area Impacted (the percent of the Area at Risk to an impact from each Hazard)	Health and Safety Consequences	Property Damage (The amount of property damage that may occur)	Environmental Damage	Historically Significant Property Damage	Economic Disruption	Total:
Flooding							
Dam & Levee Failure							
Erosion							
Earthquake							
Landslide							
Expansive Soil							
Hurricane/Tropical Storm							
Thunderstorm (wind, hail, lightning)							
Tornado							
Drought							
Heat Wave							
Winter Storm & Freeze							
Hazardous Materials Incident							
Pipeline Incident							
Meth Lab Incident							
Pandemic							
Cyber Attack							
Climate Change
